

# Corrigendum: A four-dimensional X-ray tomographic microscopy study of bubble growth in basaltic foam

Don R. Baker, Francesco Brun, Cedrick O'Shaughnessy, Lucia Mancini, Julie L. Fife & Mark Rivers

*Nature Communications* 3:1135 doi: 10.1038/ncomms2134 (2012); Published 16 Oct 2012; Updated 16 Dec 2013

The original version of this Article contained an error in the calculation of the force per fibre ( $\sigma_{\text{crit}}$ ) values in the fibre bundle model. During re-evaluation of the paper after publication, it was discovered that a step in the calculation of  $\sigma_{\text{crit}}$ —multiplication by the proportion of remaining fibres to the initial fibres ( $U$ )—had been omitted, resulting in a small error in the final values of  $\sigma_{\text{crit}}$  and in the final fragmentation threshold pressures throughout the paper including Table 1. For example, the fragmentation threshold pressures quoted in the Abstract required revision from '5–6 MPa' to '9–10 MPa'. These changes have now been applied throughout the PDF and HTML versions of the Article.
