

Mice deficient in protein tyrosine phosphatase receptor type Z are resistant to gastric ulcer induction by VacA of *Helicobacter pylori*

A Fujikawa, D Shirasaka, S Yamamoto, H Ota, K Yahiro, M Fukada, T Shintani, A Wada, N Aoyama, T Hirayama, H Fukamachi & M Noda

Nat. Genet. **33**, 375–381 (2003).

On page 378 in the left column, the second full sentence should read, “Git1 is tyrosine-phosphorylated by Ptk2 (also called FAK) and Src (also called c-src; refs. 26,27), although its physiological role is not clear.”
