

Microarrays: common ground for biologists and physicists

Curtis Altmann and Ali H. Brivanlou

Nat. Neurosci. 5, 931 (2002).

The authors wish to correct the sentence in paragraph 4 on page 931, which should read “Moreover, chapter 5 of this book is nearly identical to chapter 9 of the MIT Press book, including identical figures.”

How not to get caught

Lyle Graham

Nat. Neurosci. 5, 1256–1257 (2002).

The author apologizes for the error in the affiliation mentioned in this News and Views, which should be the Unité de Neurosciences Intégratives et Computationnelles, CNRS, 1 Avenue de la terrasse, 91198 Gif-sur-Yvette, France. Please note that he will move in January 2003 to the Laboratoire Neurophysique et Physiologie du Systeme Moteur, CNRS, 45 rue des Saint-Peres 75270 Paris Cedex 06, France, where correspondence should be thereafter directed.
