Retraction to: *Molecular Psychiatry* (2018) **25**:750–760 <https://doi.org/10.1038/s41380-018-0234-y>, published online 13 September 2018

The Editor-in-Chief has retracted this article. After publication, concerns were raised regarding the western blot images presented in Figs. 1B, 2B, 5C, S2b and Fig. S4a. The authors have provided raw data to address these concerns. However, the Publisher and independent Reviewers were unable to validate the

raw data. The Editor-in-Chief therefore no longer has confidence in the presented data.

Patrick Sleiman agrees to this retraction. Karin E. Borgmann-Winter, Steven J. Siegel, Scott E. Hemby, Raquel E. Gur and Chang-Gyu Hahn do not agree to this retraction. None of the other authors have responded to any correspondence from the editor or publisher about this retraction.
