

Keep it safe and simple

Dental implant placement is complex. So, why not invest in technology that supports the procedure, making it simpler and safer while adding flexibility to the way you work?

Implantmed from W&H is an innovative solution that has helped revolutionise implant placement for over 20 years.

Simple to use with an intuitive interface and colour touch screen, Implantmed provides secure torque control, has an automatic thread-cutter function and offers measurable implant stability. Plus, with upgrades such as wireless foot control you can ensure that you are free to work the way you want to, all the while enjoying the benefits of a truly cutting-edge system by your side.

Exceptional care

When you invest in equipment, you want peace of mind that you can rely on exceptional support from the manufacturer.

That's why when you purchase a system from Eschmann, we go above and beyond to ensure that we always offer our customers an exceptional standard of customer care.

As part of our Care & Cover policy, we provide scheduled annual validation and maintenance service visits in accordance with HTM 01-05 and SDCEP guidance, for total compliance. We also install the latest software updates for your systems free of charge, helping your practice to remain at the cutting-edge.

We have our own network of engineers, always guarantee fast response times and only

use original parts during maintenance and repair so that your systems can continue to provide an unparalleled standard of infection control.

To find out more about Eschmann's service offerings visit www.eschmann.co.uk or call 01903 875787.

The WOODI interdental brush

If you want to respect the environment while protecting your patients' oral health, the WOODI is the perfect choice.

WOODI has a handle made from FSC-certified birchwood and, like all TANDEX

products, sustainable energy sources are used in its manufacturing.

For interdental cleaning, the WOODI is easy to use, available in six sizes for different spaces. Being able to gently loosen debris from between the teeth and around the gingiva will elevate your patients' oral hygiene between appointments, reducing their risk of disease.

The WOODI is coming soon – keep your eyes on our website and social media.

Accredited training taking you from novice to implant referrals

Accept referrals and bring in a new revenue stream when you have trained in how to place and restore dental implants.

The One to One Implant Education offers a fully accredited Postgraduate Diploma in Implant Dentistry.

Under the guidance and mentorship of Dr Fazeela Khan-Osborne you will receive quality learning combining theory, hands-on teaching and live surgery. In London's Harley Street, experienced instructors will start you on your implant journey so you can help

more patients and return them to health.

Speak with The One to One Implant Education for a rewarding, profitable future.

To reserve your place or to find out more, visit <https://121implanteducation.co.uk> or call 020 7486 0000.
