

Why us?

Here at Rodericks Dental, we care about our dentists. We know that when you're provided with exceptional training opportunities, high-quality equipment and facilities, you'll be able to provide the highest standard of patient care.

By becoming part of Rodericks Dental, you'll be valued as an integral member of the

team. To show our appreciation, we provide pathways for development, such as a hands-on CPD programme, support for speciality training and mentoring for furthering your skills and knowledge. We are also dedicated to helping you provide outstanding care to your patients – with first-rate materials and modernised facilities, you can offer a broad range of treatment options to your patients.

For more information on the career opportunities available at Rodericks, please visit www.rodericksdentalcareers.co.uk, or contact Ashley Lillyman at recruitment@rodericksdental.co.uk or on 01604 970988 (option 1).

Restoring beauty and function

When a patient presents for restorative work, whether it's a cosmetic choice, because of injury or other reason, COLTENE will help you deliver treatment, fast.

Its range includes BRILLIANT Crios reinforced composite bloc, enabling the in-house CAD/CAM manufacture of restorations with exceptional mechanical properties, also BRILLIANT EverGlow submicron hybrid composite for highly-aesthetic and long-lasting solutions and BRILLIANT COMPONEER for one-visit veneers, as the shells are prefabricated.

Our mission at COLTENE is to upgrade dentistry. We will save you time and money, and allow you to administer exceptional care, for all ages and dental situations.

To find out more about our restorative range, visit www.coltene.com, email info.uk@coltene.com or call 0800 254 5115.

Restoring enamel and patient confidence

Lost or damaged enamel can have a profound impact on a patient's dental function, smile aesthetics and self-confidence. Arm & Hammer Enamel Pro Repair baking soda toothpaste can help.

Formulated to help repair compromised enamel, the toothpaste features innovative Liquid Calcium technology designed to fill micro cracks and crevices, remineralising and strengthening the teeth. This not only helps to repair damage to the enamel, but also protects the teeth from acid attack and erosion in the future.

The toothpaste combines all this with the whitening benefits of a proven baking soda solution, giving patients an added boost and enabling them to smile with confidence every day.

For more information about the carefully formulated Arm & Hammer toothpaste range, visit www.armandhammer.co.uk/ or email ukenquiries@churchdwight.com.

Top tips for recruitment and retention – get your free guide today!

Recruitment has never been harder, and the competition for candidates is fiercer than ever before. Along with many other sectors, dentistry is currently experiencing a significant recruitment crisis. There is, however, hope, says Great Boss Academy founder, Mark Topley.

Turning this hope into practical insight, he has created an invaluable guide – 'Ten Key Factors for Successful Recruitment and Retention in the Post-Pandemic Era' – which is available to download free of charge at great-boss.com. Within its pages you will find practical and actionable advice from some of dentistry's most successful and respected executives, leaders, lawyers, coaches, and trainers, including:

- Chris Barrow – author, speaker, coach
- Sarah Buxton – Partner, FTA Law
- Alex Guest – Managing Director, BioHorizons
- Nigel Jones – Sales and Marketing Director, Practiceplan
- Alex O'Neill – Head of Customer Success, Agilio Software.

Building on this valuable information, you are also invited to attend a free online workshop entitled 'Create a practice where people will love to work'. While you're there, why not check out the 'Great Boss Bootcamp'? An intensive, 10-week programme to fast-track your Great Boss development, it is open for registration at www.great-boss.com.
