Still at the top

Panavia V5 has been an industry-leading dentine bond cement for many years – and it's not going anywhere.

Manufactured by Kuraray and distributed by J&S Davis in the UK, Panavia V5 contains the original MDP monomer that optimises bond strength and durability for results you and your patients can rely on. It is also designed for ideal colour match and stability, ensuring high-quality aesthetics for a wide range of patients. Better still, the material enables a simple workflow that will save you time and hassle in the surgery. You need only prime and roughen the prosthetic, prime the tooth and apply the cement – it's as easy as one, two, three!

If you have any questions about the product and its many benefits, the team at J&S Davis would be more than happy to help! See for yourself why Panavia V5 is still a top choice for UK dental professionals.

For more information on the industry-leading products available from J&S Davis, visit www.js-davis.co.uk, call 01438 747 344 or email jsdsales@js-davis.co.uk.

Waste disposal that meets your unique needs

Your dental practice is completely unique – so why would you use a generic disposal and recycling service?

Initial Medical has decades of experience helping dental practices ensure their waste management and disposal is stress-free, and offers a completely bespoke approach for every setting. This way, your waste services can be tailored to truly reflect your needs, making the process more convenient, saving you money and helping the environment.

To find out more, get in touch at 0870 850 4045 or visit www.initial.co.uk/medical.

For a premier smile

ClearCorrect, from the Straumann Group, is a premier aligner that has been engineered for precision and comfort, helping clinicians achieve optimal results in a variety of cases.

Made from ClearQuartz, a tri-layer medical-grade plastic, ClearCorrect aligners are transparent and robust, comfortable for patients while being strong enough to correct tooth alignment effectively. Now, ClearCorrect aligners can be made even more customisable, thanks to the addition of cut outs and bite ramps.

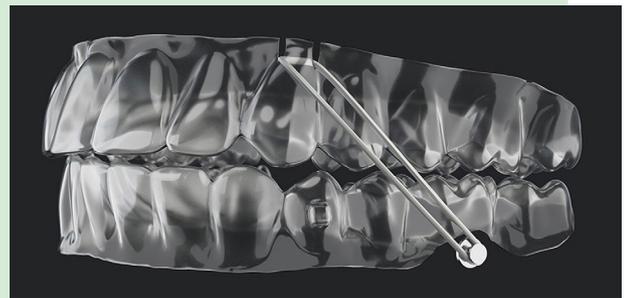

The ClearPilot treatment planning tool provides many innovative benefits, including the Individual Tooth Movement feature. Here, clinicians can make adjustments to the desired final position on the 3D model,

including intrusion and extrusion, crown tipping, crown torque and rotation.

ClearCorrect aligners suit a range of patients, with a variety of clinical needs. There's also plenty of treatment options tailored to your requirements, so you're only paying for exactly what you need.

Why not get in touch today to find out more?

Preventing long-term oral health issues

Prevention is key for the long-term health of your patients' teeth. This should always begin with maintaining good oral hygiene for the prevention of gingivitis and caries and keeping levels of plaque down.

The Kemdent Prophylaxis Paste features a medium grit and a unique formula to effectively, quickly, and easily remove food

and drink stains from the surface of the tooth. Plus, it is available as a heavy-duty grit which provides a greater removal rate. It features optimal viscosity to improve its adherence to the brush and it is thixotropic to prevent spattering for a cleaner and more pleasant experience for the patient and practitioner.

The Prophylaxis Paste is also fluoride-free and can be easily polished for a smooth finish. It's also available in several flavours to meet patient preferences and offer improved comfort and compliance during the prophylaxis procedure.

For more information about the leading solutions available from Kemdent, visit www.kemdent.co.uk or call 01793 770 256.
