

Registration is now live for BDCDS and DTS 2024!

CloserStill Media is delighted to announce that registration for the much-anticipated 2024 British Dental Conference & Dentistry Show (BDCDS) co-located with Dental Technology Showcase (DTS) is officially open.

These premier events are set to take place on 17 and 18 May at the NEC in Birmingham. Poised to be an extraordinary gathering for dental professionals, showcasing the latest innovations, research, and developments in dentistry, BDCDS and DTS promise to offer an unparalleled platform for learning, networking, and professional growth.

Key features include:

- Expert-led presentations – engage in educational sessions conducted by leading experts in the field, covering a wide range of topics from clinical excellence to practice management and patient care
- Exhibition – discover the latest dental technologies, equipment, and services from 400+ top suppliers and innovators in dentistry
- Networking opportunities – connect with like-minded peers, thought

leaders, and potential future colleagues, fostering relationships that can lead to new opportunities and advancements in your career and for your practice

- Interactive demonstrations – get hands-on experience with cutting-edge dental equipment and technologies, enhancing your practical skills.

The extensive conference programme will be taking place across 14 theatres with over 150 hours of CPD to choose from. Confirmed speakers so far include Paul Tipton, Simon Chard, Finlay Sutton, Lisa Bainham, and Maria Lessani.

The Enhanced CPD Theatre is back by popular demand for 2024 and will cover all the relevant updates in dentistry standards alongside essential topics such as consent and dentolegal issues, medical emergencies, and dental radiography.

Registration is free for dental and lab professionals and can be completed online through the official websites. For more information and to register, visit birmingham.dentistryshow.co.uk for BDCDS or the-dts.co.uk for DTS and save the dates in your diary!

Efficiency made easy

Effective dentistry doesn't have to be complicated. The team at Carestream Dental understands that brilliant care often lies in its simplicity, which led to the development of the ground-breaking CS 7200 Neo Edition, addressing everyday needs with ease.

The flexible and cable-free imaging plates are simple to position and can be used for periapical, bitewing and paediatric exams. Plus, by including a USB and Ethernet connection, the CS 7200 Neo Edition is a versatile chairside or practice-wide solution. Make the CS 7200 Neo Edition a system that lasts in your practice, with the new extended warranty guarantee from Carestream Dental. Lean on our 125 years of experience, and access spare parts when you need them, to keep your care reliable in the long-term.

To learn more about the simple solution to intraoral plating systems, consider the CS 7200 Neo Edition, and visit www.carestreamdental.co.uk.

Health literacy in the fight against dental caries

It has been estimated that 41% of working-age adults in the England don't fully understand or make use of everyday health information. Health literacy is directly linked to health outcomes and service use, so it's crucial that public education be enhanced.

Chairsyde is a state-of-the-art consultation platform that is designed to help dentists do just this among their patients.

It offers a library of animations that clearly and easily communicate a broad range of dental conditions and diseases

– including dental caries – as well as the treatments associated with them. The videos cover the risks of disease progression, in

addition to the benefits, limitations and potential risks of all recommended therapies, encouraging patient understanding for long-term health benefits and improving the quality of their consent.

For more information, or to book a demo visit www.chairsyde.com or call 020 3951 8360.
