

Compete for prizes

It is easy for a lot of hard work to go unnoticed in dentistry. But for members of the British Endodontic Society (BES), brilliance isn't just encouraged – it is celebrated. The BES Awards honour those who have gone above and beyond in endodontology. Undergraduates can enter such prestigious competitions as the Harty Essay Prize and the Undergraduate Research Prize, whilst the Inspirational Part/Full-time Lecturer Awards honour those educating the next generation of dentists.

The General Dental Practitioner Prize is highly competitive, with the largest

proportion of BES members being eligible for this award, supporting the development of endodontic skills and knowledge amongst the frontline clinicians.

With award winners receiving such rewards as a BES certificate, a cash prize or a free BES membership for a year (depending on the award), BES Awards are a great way to achieve recognition. To push your skills to the next level and partake in a healthily competitive environment, or for more information about the BES, visit www.britishendodonticsociety.org.uk or call 07762945847.

Revenue is up for the majority of UK dental practices

The Dental Elite Benchmarking Report 2024 offers an up-to-the-minute snapshot of the current dental market and shares average revenue and expenditure figures for practices across the UK.

Key findings include:

- Average practice turnover grew by just over 11%
- NHS revenue reduced slightly
- Mixed practices experienced the highest profit margins
- A significant increase in patient plans was confirmed (23%).

To see how your practice stands up against others in the market, the full report can be downloaded from the website. The Dental Elite team are also available to provide further market insights and bespoke advice on how you could enhance the value of your business, whether that involves optimising space, diversifying revenue streams or managing staff more effectively.

For more information or to download the Benchmarking Report 2024 visit dentalelite.co.uk/benchmarking-report/, or contact the team on 01788 545900.

Bringing dental professionals together

Networking helps with career growth and opportunities to do so don't come bigger and better than BDIA Dental Showcase 2025.

As the UK's largest dental exhibition, meeting colleagues in a face-to-face social environment makes BDIA Dental Showcase the most important event of the year, for every dental professional. You can build long-lasting friendships and share advice and experience with like-minded professionals, helping you to achieve your career goals.

For more social and networks benefits, BDIA Dental Showcase allows attendees to engage with a range of product developers and top industry experts for transformative business advice and guidance. This dynamic platform for knowledge exchange and product demonstration reaffirms BDIA

Dental Showcase's reputation for bringing together dental professionals from across the UK.

To expand your network and learn from the best, add BDIA Dental Showcase 2025 to your calendar on 14 and 15 March, 2025, at ExCeL London.

Advanced education in full mouth oral implant rehabilitation

To stay at the forefront of your field, it is essential to pursue the highest quality education. Ucer Education, in collaboration with the ICE Postgraduate Dental Institute and the University of Salford, offers an exceptional opportunity, with the Advanced Certificate in Full Mouth Oral Implant Rehabilitation.

The course is directed by Professor Cemal Ucer, a world-renowned specialist oral surgeon dedicated to mentoring and education, alongside a distinguished team of expert faculty members.

Tailored for experienced implant dentists, this course delivers structured and comprehensive training in reconstructive oral implant surgery and prosthodontics over a 4-month period. Participants will acquire advanced techniques to address the needs of fully edentulous patients, who often face both functional and aesthetic challenges due to disuse atrophy.

Covering everything from digital diagnostics imaging and treatment planning to atraumatic extraction, advanced surgical options and stages of a full single/dual arch implant rehabilitation, enrolling on this course will enable you to treat even the most complex cases in-house. Find out more today by contacting Professor Ucer at ucer@icedental.institute or Mel Hay at mel@mdic.co or 01612 371842.
