A natural alternative

One of the drawbacks of using traditional toothbrushes is the waste, with many coming in plastic packs.

Curaprox is passionate about protecting every patient's oral health and believes that this should not come at the expense of the environment. Enter the CS Wood, a toothbrush designed with as much care for the teeth and gingivae as for the natural world.

4,400 ultra fine Curen filaments crown a handle made from sustainably-sourced Swiss beech wood, offering a perfect blend of hardness and durability that provides exceptional cleaning power. Along with its recyclable packaging, the CS Wood is also biodegradable – simply remove the brush head and put the handle in a compost bin.

Available in four vibrant colours and protected from water damage with carnauba palm tree wax, the CS Wood is a reflection of the innovative design that is central to the Curaprox product range.

Protect teeth and protect the environment with the CS Wood toothbrush.

To arrange a Practice Educational Meeting with your Curaden Development Manager email sales@curaden.co.uk.

For the complete implant journey

To support as many patients as possible, your treatments need to be grounded in systemic care. The PG Diploma in Implant Dentistry from One to One Implant Education helps you develop knowledge on everything from the consultation process and personalised care planning, through to implant placement and management.

Delegates are able to identify complications, and employ effective, evidence-based techniques that help patients get the permanent restorations that they desire.

The PG Diploma in Implant Dentistry covers

important aspects of care such as immediate placement and loading, guided bone regeneration, full arch implant dentistry and more. Dr Fazeela Khan-Osborne, founder of One to One Implant Education, leads the courses, providing clinicians with support to any and all questions that they have.

To reserve your place or to find out more visit <https://121implanteducation.co.uk> or call 020 7486 0000.

Patient-preferred fluoride treatment

Join clinicians providing the next generation of fluoride treatment with the 3M Clinpro Clear Fluoride Treatment from Solventum, formerly 3M Health Care.

The water-based, rosin-free formula tastes, feels and looks better on teeth than traditional varnish treatments, making it a preferred option for patients. Without sticky residues or yellow appearance that can be common with other solutions, the 3M Clinpro Clear Fluoride Treatment adds to a pleasant experience in the practice. A convenient delivery system, built with the unique press and go L-Pop system, makes for an improved experience for clinicians.

It's the ideal next step for effective fluoride uptake for your patients.
