In the version of this article initially published, there were presentation errors in the Figure 2 and 4 schematics, where in Figure 2a, the left-hand and right-hand FcγRIIIa N-glycans were pictured with incorrect bisecting GlcNAc moieties, and the left-hand FcγRIIIa N-glycan was missing a fucose. Also, the left-hand IgG Fc G2F0 N-glycans were pictured with incorrect bisecting GlcNAc moieties, and two of the right-hand IgG Fc G0F1 N-glycans were pictured with incorrect bisecting GlcNAc and terminal galactose moieties. In the lower part of Figure 2a, on the left-hand side, IgG Fc G2F N-glycans were depicted with incorrect bisecting GlcNAc moieties, and on the right-hand side, 12 G0F Fc N-glycans were depicted with incorrect bisecting GlcNAc moieties and were missing a fucose, and one also had incorrect terminal galactose moieties. In Figure 2b, six G2F Fc N-glycans were depicted with incorrect bisecting GlcNAc moieties. In Figure 4b, the IgG Fc G2F N-glycans were shown with an incorrect bisecting GlcNAc, and in Figure 4c, the “Autoantibody” feature was shown with fucose groups on the left-hand side, which are now reversed. The figures have been replaced in the HTML and PDF versions of the article.
