

Publisher Correction: An immunoregulatory and tissue-residency program modulated by c-MAF in human T_H17 cells

Dominik Aschenbrenner , Mathilde Foglierini , David Jarrossay, Dan Hu, Howard L. Weiner, Vijay K. Kuchroo, Antonio Lanzavecchia, Samuele Notarbartolo  and Federica Sallusto 

Correction to: *Nature Immunology* <https://doi.org/10.1038/s41590-018-0200-5> (2018), published online 10 September 2018.

In the version of this article initially published, in the legend to Fig. 1b, the description of the frequency of T_H17-IL-10⁺ clones was incomplete for the first group; this should read as follows: "...13 experiments with clones isolated from CCR6⁺CCR4⁺CXCR3⁻ T cells...". Also, the label along the vertical axis of the bottom right plot in Figure 5b was incomplete; the correct label is 'IFN- γ ⁺ cells (%)'. Finally, in the first sentence of the final paragraph of the final Results subsection, the description of the regions analyzed was incorrect; that sentence should begin: "DNA motif-enrichment analysis of the subset-specific H3K27ac-positive regions...". The errors have been corrected in the HTML and PDF versions of the article.
