In the version of the article initially published, the BRB80 buffer composition described in the Materials section was incorrect and should have read: “To prepare BRB80, mix 3.2 ml of 0.5 M PIPES (pH 6.8), 40 µl of 0.5 M K-EGTA (pH 7.7) and 20 µl of 1 M MgCl₂, and make up the final volume of 20 ml with water; the final composition is 80 mM K-PIPES, 1 mM K-EGTA, 1 mM MgCl₂. Filter-sterilize and store at 4 °C for up to several months.” This notice serves to correct the error.
