## Publisher Correction: Method to Reduce Long-lived Fission Products by Nuclear Transmutations with Fast Spectrum Reactors

Satoshi Chiba<sup>1</sup>, Toshio Wakabayashi<sup>2</sup>, Yoshiaki Tachi<sup>3</sup>, Naoyuki Takaki<sup>4</sup>, Atsunori Terashima<sup>1</sup>, Shin Okumura<sup>1</sup> & Tadashi Yoshida<sup>1</sup>

*Scientific Reports* 7:13961; doi:10.1038/s41598-017-14319-7; Article published online 24 October 2017

The original version of this Article contained typographical errors in the Abstract.

“With the YD<sub>2</sub> moderator in the radial blanket and shield regions, effective half-lives drastically decreased from 10<sup>6</sup> to 10<sup>2</sup> years and the support ratios reached 1.0 for all six LLFPs”.

now reads:

“With the YD<sub>2</sub> moderator in the radial blanket and shield regions, effective half-lives drastically decreased from 10<sup>6</sup> to 10<sup>2</sup> years and the support ratios reached 1.0 for all six LLFPs”.

This has now been corrected in the PDF and HTML versions of the Article.
