

they had a duty to support and sustain those personnel who put their lives at risk on a daily basis, and provide them with the best support that we were resourced to deliver. The comments from the medical officers on location also support the importance and utility of these clinics, acknowledging the significant contribution to care that these clinics provide.

It is considered that this review of a service within the military environment gives some insight into the role of mobile

dental teams in a combat environment, and also demonstrates the importance of oral health and facilitated access to care for military personnel.
