

## Amalgam safety in your practice

It's the end of the first year of the amalgam phase-down across the EU, but it's clear that safe waste management solutions like the PureGuard Dental Container Range from Initial Medical are as important as ever before.

The PureGuard Dental Container Range features a specialised suppressant, which absorbs mercury vapours, protecting your team and providing a safe storage solution for amalgam contaminated waste streams. Containers are collected by the

Initial Medical team to be fully recycled at their ISO 14001:2015 (environment) certified dental recycling facility.

Clinicians are provided with recycled containers to ensure their practice faces no down time, and the cycle of green amalgam waste collection continues.

To find out more get in touch at 0808 304 7411 or visit [www.initial.co.uk/medical](http://www.initial.co.uk/medical).

## Comfort and relaxation at its core

Comfort can have a big impact on patients' experiences. Clark Dental understands the significance of the treatment centre both from a functional and comfort perspective. With 50 years of experience working alongside oral healthcare professionals, the team helps to select the right product to suit each individual's unique needs.

The A-dec 400 Pro brings relaxation to the treatment room, helping to put your patients at ease, with pressure-mapped surfaces for support and smooth, quiet positioning for peace of mind. It's designed to help clinicians work more efficiently, whilst supporting safe practice.

For more information call Clark Dental on 01268 733146, email [info@clarkdental.co.uk](mailto:info@clarkdental.co.uk) or visit [www.clarkdental.co.uk](http://www.clarkdental.co.uk).

## Connections for success

Dentistry can often feel like an isolating industry to work within, but connections and networking can make all the difference to not only better understanding, but for driving progress. BDIA Dental Showcase is the perfect network hub for flourishing connections. With thousands of industry professionals, over 300 exhibitors, and a multitude of field-specific events, BDIA Dental Showcase offers the opportunity to learn from likeminded peers and experts.

Networking allows clinicians to discuss complex cases and gain insight into greater solutions from those who have experienced similar challenges. For oral healthcare professionals, business owners and students, these connections are invaluable in establishing supportive collaboration and inspiration that lasts far beyond the day.

BDIA Dental Showcase takes place on 13 and 14 March 2026 at ExCeL London. Find out more at [www.dentalshowcase.com](http://www.dentalshowcase.com).
