In the version of this article initially published, while the code for the transmission rate β , equation (8), was correctly implemented in the code for the numerical simulation of the model and its fitting to the time series data, as shared in Github, the final term “+ b_T TEMP” and associated description was missing from the equation (8), which has now been corrected to read

$$\beta(t) = \exp \left[\sum_{k=1}^6 b_k S_k + b_{T_4} S_4 \text{TEMP}_1 + b_{T_6} S_6 \text{TEMP}_2 + b_T \text{TEMP} \right] \frac{dT}{dt}$$

in the HTML and PDF versions of the article.
