In the version of Supplementary Fig. 3d initially published alongside this article, the image shown in the Basal; +1 day panel was an inadvertent duplicate of the Spinous; +1 day image above. Due to the age of the article, the Supplementary Information in the original article cannot be replaced directly; instead, the revised Supplementary Information accompanying this amendment serves to correct the article.

In the version of the article originally published, two FACS plots shown in Extended Data Fig. 8i and Extended Data Fig. 9i were identical. This was an error. FACS experiments in Extended Data Fig. 8 (lymph nodes) and 9 (spleens) were performed simultaneously. After compensation, the authors generated total quantifications and selected representative plots reflecting the mean values. They did not notice that two plots for activated dendritic cells had the same value (44.1) in different groups, and they inadvertently duplicated the PBS plot from Extended Data Fig. 9i in Extended Data Fig. 8i (AAV8-eGFP). Extended Data Fig. 8i has now been replaced with the correct representative plot. The values are identical and no differences were detected between groups. This correction has been made to the HTML and PDF versions of the article.
