In the version of the article originally published, equations for threshold elemental ratios ( $TER_{C:N}$  and  $TER_{C:P}$ , eqs. 1 and 2) were incorrectly written, with the enzyme ratio in the numerators ( $\frac{BG+LAP}{LAP+NAG}$  and  $\frac{BG+LAP}{AP}$ ) being divided by the biomass nutrient ratios ( $B_{C:N}$  and  $B_{C:P}$ ):

$$TER_{C:N} = \frac{\left(\frac{BG+LAP}{LAP+NAG}\right) / B_{C:N}}{n_o} \quad (1)$$

$$TER_{C:P} = \frac{\left(\frac{BG+LAP}{AP}\right) / B_{C:P}}{p_o} \quad (2)$$

However, the correct formula (and the one used in the paper for the calculations) multiplies these two terms:

$$TER_{C:N} = \frac{\left(\frac{BG+LAP}{LAP+NAG}\right) \times B_{C:N}}{n_o} \quad (1)$$

$$TER_{C:P} = \frac{\left(\frac{BG+LAP}{AP}\right) \times B_{C:P}}{p_o} \quad (2)$$

The error was limited to the equations in the text, and does not affect the results, figures or conclusions in any way. The equations have been corrected in the HTML and PDF versions of the article.
