In the version of the article initially published, in Fig. 1, the second from right image in panel i was a duplicate of the far-right image in panel h. Fig. 1i has now been corrected and includes the correct image. Additionally, in Fig. 6c, the units above the scale bar were “ μ m” and are now “cm”. These corrections have been made to the HTML and PDF versions of the article.

In the version of this article initially published, thanks to the PRISM Lab at The Broad Institute for running the PRISM assay was not included in the Acknowledgements, while the original “Multiplexed cancer cell profiling of a PARP7 inhibitor” section of Methods has now been updated with details specific to that assay. For comparison, the original version of that paragraph in Methods is available in the Supplementary information accompanying the online version of this amendment. The changes are reflected in the HTML and PDF versions of the article.
