Author Correction: A soluble truncated tau species related to cognitive dysfunction is elevated in the brain of cognitively impaired human individuals

Peng Liu, Benjamin R. Smith, Michelle L. Montonye, Lisa J. Kemper, Kailee Leinonen-Wright, Kathryn M. Nelson, LeeAnn Higgins, Candace R. Guerrero, Todd W. Markowski, Xiaohui Zhao, Ashley J. Petersen, David S. Knopman, Ronald C. Petersen & Karen H. Ashe

Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-020-60777-x>, published online 02 March 2020

The original version of this Article contained errors. The present address for Xiaohui Zhao was incorrectly given as “AstraZeneca, Gaithersburg, MD, 20878, USA” which has now been removed from the Article.

As a result, the Competing Interests statement now reads:

“Xiaohui Zhao is currently an employee of AstraZeneca and contributed to this research before joining AstraZeneca.”

These have now been corrected in the PDF and HTML versions of this Article.
