## Author Correction: The effects of text direction of different text lengths on Chinese reading

Yanqun Huang, Yifan Dong, Zhaojun Jiang, Peng Zhang, Jutao Li & Junyu Yang

Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-023-35859-1>, published online 29 May 2023

The original version of this Article contained an error in the Introduction section, where

“For thousands of years, the traditional Chinese writing layout has followed a vertical arrangement (i.e., the word order is from top to bottom, and the line order is from left to right), reflecting long-standing Chinese culture and expressing an Oriental manner of cognition<sup>8</sup>”

now reads:

“For thousands of years, the traditional Chinese writing layout has followed a vertical arrangement (i.e., the word order is from top to bottom, and the line order is from right to left), reflecting long-standing Chinese culture and expressing an Oriental manner of cognition<sup>8</sup>”

The original Article has been corrected.
