Retraction Note: Association between the composite dietary antioxidant index and metabolic dysfunction-associated steatotic liver disease in adults: a cross-sectional study from NHANES 2017–2020

Published online: 11 February 2025

Zheng Yang, Shupeng Song, Lufeng Li, Zhe Yuan & Yongguo Li

Retraction of: *Scientific Reports* <https://doi.org/10.1038/s41598-024-63965-1>, published online 14 June 2024

The Authors have retracted this Article.

After publication it was brought to the Authors' attention that they used two NHANES datasets (2017–2018 and 2017–March2020) that contained partially overlapping data and therefore could not be combined. The Authors performed a reanalysis using the separate NHANES 2017–2018 and 2019–March2020 datasets; however, this new analysis resulted in differences in several significance values, which changed the conclusions of the original Article.

All Authors agree to this retraction and its wording.
